---

## **Professional Summary**

Full-Stack Software Developer with strong experience building secure, database-driven applications using C#, .NET, JavaScript, React, and SQL. Skilled in API development, debugging, data validation, and system design, with a proven ability to deliver reliable, production-style software solutions across web, mobile, and microservices environments.

---

## **Education**

### **The Independent Institute of Education (IIE) – Nelson Mandela Bay**

Bachelor of Computer and Information Sciences in Application Development (Completed 2025)  
Higher Certificate in Information Technology in Support Services (Completed 2022)

### **Kabega Christian School**

National Senior Certificate (2020)

---

## **Relevant Experience**

### **Coinnect | Secure Digital Finance Management Platform**

Node.js, Express, React, MongoDB, Docker, DevSecOps

[https://github.com/VCNMB-3rd-years/INSY7314\\_POE.git](https://github.com/VCNMB-3rd-years/INSY7314_POE.git)

- Developed and tested secure financial transaction workflows using REST APIs and role-based access control
- Performed API validation and debugging to ensure data integrity and consistent system behaviour
- Applied secure coding practices including authentication, input validation, and access control
- Identified and resolved defects through structured testing and root-cause analysis

## **Municipality Report Issues Portal | ASP.NET MVC Web Application**

C#, ASP.NET MVC, Data Structures & Algorithms

<https://github.com/VCNMB-3rd-years/vcnmb-prog7312-2025-poe-ST10085670.git>

- Built a full-stack web application for logging and tracking municipal service requests
- Designed and optimised SQL queries and database workflows for reliable data handling
- Implemented validation and debugging processes to ensure system stability

## **WIL Project | IoT Smart Device Control System**

C++, ESP8266/ESP32, Networking

[https://github.com/Kuhle-MM/AttndEase-Attendance\\_Tracker.git](https://github.com/Kuhle-MM/AttndEase-Attendance_Tracker.git)

- Developed an IoT-based automation system for remote device monitoring and control
- Implemented API-driven communication and object-oriented embedded logic

## **BuggyBank | Android Personal Budget Tracker**

Kotlin, AndroidX, Firebase

<https://github.com/VCNMB-3rd-years/BuggyBank.git>

- Built a mobile application for real-time financial tracking using Firebase authentication and database services
- Implemented dashboards, reporting features, and search functionality

## **P.A.M. (Personal Assistant Machine) | Full-Stack Robotics & Mobile System**

Kotlin, Jetpack Compose, REST APIs, Raspberry Pi

[https://github.com/Kuhle-MM/PROG7314\\_POE\\_PAMZOZO.git](https://github.com/Kuhle-MM/PROG7314_POE_PAMZOZO.git)

- Developed a full-stack system integrating mobile, backend, and hardware components
- Enabled real-time communication for camera streaming and device control

## **ArgiEnergyConnect | Microservices-Based E-Commerce Platform**

ASP.NET Core MVC, C#, .NET 6, REST APIs, Docker

<https://github.com/VCNMB-3rd-years/vcnmb-prog7311-2025-poe-ST10085670.git>

- Developed microservices-based architecture with separate user and product services
  - Implemented secure API communication with authentication and role-based access control
  - Tested and validated inter-service communication to ensure reliability
-

## **Professional Experience**

### **Personal Assistant | Sanlam Arika**

August 2022 – March 2023

- Provided first-line technical support, troubleshooting hardware, software, and connectivity issues
  - Logged and tracked system issues, ensuring accurate documentation and resolution
  - Analysed recurring problems and contributed to improved troubleshooting workflows
  - Strengthened technical communication and structured problem-solving skills
- 

## **Technical Skills and Interests**

### **Programming Languages:**

C#, Java, JavaScript, TypeScript, Kotlin, SQL, HTML5, CSS3, Python (Basic), C++

### **Frameworks & Libraries:**

.NET Core, ASP.NET Core MVC, React.js, Node.js, Express.js, Tailwind CSS, Bootstrap, JUnit

### **Databases & Cloud Technologies:**

SQL Server, MySQL, MongoDB, Firebase, Google Cloud Firestore, Microsoft Azure, Oracle Database

### **Developer Tools & Platforms:**

Git, GitHub, Docker, Postman, Visual Studio, Visual Studio Code, IntelliJ IDEA, Android Studio

### **Software Development Concepts:**

REST APIs, Microservices, MVC Architecture, Object-Oriented Programming (OOP), Agile Development, SDLC, Authentication & Authorization, Secure API Development

### **Areas of Interest:**

Full-Stack Development, Backend Engineering, Cloud Technologies, Software Architecture, DevOps, FinTech Solutions, AI-Assisted Development

### **Soft Skills:**

Problem Solving, Analytical Thinking, Communication, Team Collaboration, Adaptability, Time Management, Attention to Detail, Continuous Learning

---

## **Positions of Responsibility**

### **Academic Project Team Lead**

- Led development teams across multiple software projects, coordinating tasks, version control, and delivery timelines
